

# Main Messages

- VDR's are already being produced by product manufacturers today
- Machine readable VDR's are proprietary, unique to each MFG
- A standard machine readable VDR, based on NIST guidelines would help consumers automate their risk response for new vulnerabilities
- CVE needs to be updated or replaced to enable automatic downloads of VDR's for products using names users are familiar with
- Proposal: Release a V1.0 VDR standard format based on supplied materials; Use as a baseline, VDR minimum elements to start enhancements for a V 2.0 VDR standard
